

## **Kirkman Donation Adds ADA Features to Fine Arts Building**

The Foundation approached one of their generous donors in regard to financing a Fine Arts Building renovation to make the ground floor handicapped accessible. This renovation has been needed for quite some time, but College funds were not available. A wide hallway was built between the top level allowing our guests, students, faculty and staff to utilize each side of the building without going up and down several flights of stairs. Now you can walk from the Shafer Art Gallery to the Dorothy Moses Morrison Chapel much easier.

The lower level of the Fine Arts building was also enhanced by adding an outside sidewalk and electrical door that can be used to enter the building. This gift from Don and Karla Kirkman of Great Bend made this ADA project a reality and has already received many compliments from everyone that uses the Fine Arts facility. The Foundation and College are very grateful to the Kirkman's for these wonderful facility improvements.
