Western Kansas.....	94
When to come to Kansas.....	264
What to bring.....	266

“Resources of Kansas.”

PUBLISHED BY STATE AID AND AUTHORITY.

This is the cheapest book before the public, and is the only work published which claims to treat of the entire State of Kansas. The map accompanying each book is the latest and best out, and is alone worth the price asked for the book and map.

The engravings cost \$1,800, and in number and character are far superior to anything ever before attempted in a similar work.

The articles upon “Survey of Public Land,” and “Acquiring Title to Public Land,” contain information of incalculable value to every western man, and the matter there presented *cannot be found collected in any other publication*, but exists in disconnected laws, rulings, decisions and directions of the Land Department. The Surveying article was corrected and approved by the Surveyor General of Kansas, and the Land Sale article was revised by the officials of three United States Land Offices.

The articles upon growing “Hedges and Forest Trees,” “Fruit Growing,” “Cattle Business,” “Sheep Business,” etc., were prepared by men of wide experience in each department, and are worth many times the price of the book to all persons engaging in these pursuits.

Price of the book with map, in paper covers, \$1.00; neatly bound in muslin, \$1.50. Sent post-paid on receipt of price. In quantities of one-half dozen or more, it will be sent post-paid at a reduction of one-sixth from the above rates.

All orders must be accompanied by cash.

A LIBERAL DISCOUNT TO THE TRADE.

Agents wanted.

Address C. C. HUTCHINSON, Topeka, Kansas.
